

APPENDIX A

MARKED-UP VERSION OF AMENDED CLAIMS (OFFICIAL)

1. (Amended) A method of reducing the growth rate of a tumor, comprising contacting a cell within said tumor with (a) a DNA segment encoding a functional p53 protein and (b) a DNA damaging agent in a combined amount effective to inhibit the growth of said tumor[, wherein functional p53 protein is expressed in the cell].

32. (Amended) A composition comprising a) an exogenous DNA segment encoding a functional p53 polypeptide and b) a compound comprising a DNA damaging agent.
